Overarching Approach

1. We need to clone the branch **EDDY-DotNetDeveloper-2024-01**.
2. Based on this branch we need to create a new one with the following naming standards:
EDDY-DotNetDeveloper-2024-01_{YOUR FIRST NAME}{YOUR LASTNAME}_{YYYYMMDD}
3. Work on the requirements.
4. Commit and push your changes.

Assessment Points

- Following instructions.
- Quickness of solving problems.
- Creativeness of solution.
- Usage of Git.

Requirements

Estimated overall time: 30 minutes.

Requirement	Estimated Completion Time
We need to implement a brand-new interface in the project to deal with pet , with the following properties: Name, Age, Price .	3 minutes
We need to create 2 classes named “Dog” and “Cat” ; we need to implement the pet’s interface in both as well.	3 minutes
We need to store some data regarding dogs and cats by the following: <ul style="list-style-type: none">• For practical purposes, an exceptional solution to deal with is a static class for storage.• We need some initial data: 3 cats and 2 dogs.	5 minutes
In “PetController” we need an action to list the pet’s information.	5 minutes
In “DogController” we need an action to list information regarding of dogs.	2 minutes
In “CatController” we need an action to list information regarding of cats.	2 minutes
In “PetController” we need an action that returns a string breaking in lines per record with the total quantity of pets, dogs, and cats with the following format: <ul style="list-style-type: none">• Total Pets: 12• Total Dogs: 10• Total Cats: 10	5 minutes
For “DogController” and “CatController” we need an action to add records for dogs. No needed any kind of evaluation.	5 minutes
